

Ellison Test Certificate

The Ellison Test is the world's most robust data sanitisation analysis, and forms a critical requirement for ICT Asset Recovery Standard 8.0 and ITAD Essentials certifications. Ellison Test verifies that data sanitisation practices are fit for purpose, to protect customer data.

Ellison Test Number:

ELL024

Date of Test:

07.07.2025

Testing organisation and forensic analyst name:
ADISA CERTIFICATION LIMITED
JOSHUA SHEPPARD

Pass

IT Hardware Services (SM) Ltd
THE OLD EXCHANGE, LE
CHEMIN DE L'EGLISE, ST.
OUEN, JERSEY, JE3 2HZ

The results presented in this document are only valid within the forensic environment that was set up during the test. The full results are in the client report and available at the client's discretion.

Date of Test:

07.07.2025

The Ellison Test is an independent assessment of the data sanitisation methods used at this facility. Conducted by a certified data sanitisation analyst, the test evaluates techniques for both data re-use and destruction across various types of storage media. For more information, visit: www.ellisontest.com/what-we-test

The test is conducted on a specific day, and the findings reflect the performance observed on that day.

Data Capability	This media was tested and passed by ADISA forensic analysts	
	Reuse	Destruction
