

Compact Power for Confident Erasure

Secure, Certified Data Erasure for Network Equipment

- Switches
- Routers
- Firewalls
- Access Points

Purpose-Built for the Real World

Hydra is a dedicated, portable solution for secure, certified data erasure across a wide range of network equipment. Designed with ITADs in mind, it streamlines high-throughput workflows with zero compromise.

- ⇒ No racks
- ⇒ No tethering
- ⇒ Just plug in, power up, and erase.

Small But Mighty

At just 12cm x 12cm x 7.5cm, Hydra fits in the palm of your hand – but don't let its size fool you.

Built to perform in tough environments, it delivers industrial-grade erasure power in a compact, rugged form factor.

Compact doesn't mean compromise.

Broad Compatibility

Hydra supports a wide range of equipment from leading manufacturers:

- Switches
- Routers
- Firewalls
- Access Points

The flexibility ITADs need - without the complexity they don't.

Connected and Capable

Hydra operates via a secure wireless connection and is built for mobile and remote workflows. It also offers full offline functionality – ideal for field work and client sites without connectivity.

When back online, Hydra auto-syncs with the secure NovaFox portal, ensuring erasure reports and audit logs are updated and centrally accessible.

Fast. Efficient. Flexible.

- ⇒ Optimised for high-speed erasure workflows
- ⇒ Works independently – no PC or software required
- ⇒ Clean, technician-friendly interface
- ⇒ Minimal setup, maximum throughput
