ITHSCI.COM

We are aware that organisations sometimes have short term data storage requirements, why may you need short term storage?

- You need a full backup of your data here in the Channel Islands, attached to your server network.
- You're moving office.
- You're moving Data Centre or cloud provider.
- Don't want to transfer large volumes of data over the internet / leased line / private circuit.
- Cost to move data over your private circuits.
- You need to move your production equipment to another environment but want to cover, the what if the van doesn't get to the destination, but still need your data accessible for a short period of time as contingency.

If you have any short term data storage requirements we can potentially help:

- Rental of our on island Dell Compellent SC280 336TB naked storage shelves.
- We have 2 in stock here in Jersey.
- Stage the kit in ITHSCI server room, then ITHSCI can transport to your facility for you to copy your data to the rental storage.
- Your data stays where you want it.
- At the end of the rental, we will data erase the drives to certified standards.
- We handle to installation and removal of servers and storage, you present to your network and use your data
